(54) Title: INFORMATION PROCESSING APPARATUS, PRINT CONTROL APPARATUS, PRINT CONTROL SYSTEM

(57) Abstract: An information processing apparatus, which encrypts print data (PDL), receives a personal identification code (PIN) input by a user, generates a random number (rnd), encrypts the generated random number by using the personal identification code or an encryption key generated based on the personal identification code, converts the personal identification code by using a pre-determined function, and encrypts print data by using the random number as an encryption key, thereby maintaining security in the printing.
